<u>Project</u>	Kinematic design and development of three axis gear mechanism trailer:- The older dropping trolley has been conceived by observing the difficulty in unloading the materials. The survey in this regards the automobile garages in which some difficult methods were adopted for unloading materials so. Our main project is three axis pneumatic modern trailer works on the principles of pneumatic mechanism. In this project the efficiency of dumping trailers will increase. The unloading of materials can be done to the three directions. This is very useful in the shipping industry. We are choosing this project for the decreasing man power and time. We have chosen this project because of the various attractiveness of pneumatics. Controlled nonlinear system, which renders the system, originally discontinuous and possibly non-affine in the input into an equivalent system that is both continuous and affine in control input.
