PROJECT DETAIL

- TITLE : **360 ROTATION MECHANISM FOR TOWING VAN**

ROLE : Process Planning

DETAIL: The aim of this project is provide better design to towing van . The main important parameter of industry and public place is time and working area. Now, a days towing vans are use for loading and unloading materials. At present ,towing beam is not rotating 360 degree. This project provide an additional design like epicyclic gear train for 360 degree rotation of beam .So, the design model is giving successfully the positive result.
