ACHIEVEMENTS

- During last year of my B.E. MECHANICAL ENGINEERING, I and my group members worked on Tensile Testing Machine because these days, some manufacturing industries have tensile testing machine. They are used to take to measure strength of material and control the quality of products. These machines have massive in size and higher weight. Thus, we developed new tensile testing machine, which is higher accuracy and more flexibility. So, we got first rank among all 26 projects and my college was given to grant us 26,000 rupees.
