- Good judgment, strong common sense, and excellence attention to details.
- Strong team player, excellent communication skill with an ability to guide and persuade others.
- Excellent team skills, able to build and sustain a network of contacts.
- Strong coordination skills, ability to multi task and meet deadlines.

PROJECTS

- **AUTOMOBILE CUTTING BRAKE SYSTEM** *1 year*
- Turning radius is essential factor for every vehicle while turning. Low turning radius plays important role in off road vehicle as well. Our designed turning radius reducing system will help

drivers to turn vehicle in shortest radius. This system is called cutting brakes. Currently cutting brakes is available in market, but in that system too many parts are required. And overall cost of the system is very high. So we designed new system with reduced parts. Old system does not interfere with main service brakes but in our design cutting brakes is a part of the service brakes.

INTERESTS

- Quality Control and Inspection.
- Project Management.

ACTIVITIES

- I Participated in the international level Mobile Control Robotics workshop of Robo-Zest from 6/10/2015 to 07/10/2015 at Gandhinagar Institute of Technology. The workshop has been conducted by RoboSpecies Technologies Private Limited and accredited by International Accreditation Organization , Houston, U.S.A.
