CHAIRMAN & DIRECTOR'S MESSAGE

At Relief Pumps, we are poised to offer best-in-class sourcing and intelligent supply chains that derive competitive edge for our global clientele. We understand that in this intense competition, companies require enterprise-ready, on-demand sourcing solutions that deliver sustainable bottom-line savings and top-line growth.

We would like to extend our sincere thanks to your trust and support, which enables our group to develop soundly and make a good social image.

With more than 30 years' of development, Relief Pumps group has put in effort and sweat to develop itself into a leading manufacturer in India from a small workshop. Our company is the result of a unique combination of a Strong Management Team, Professionals and a Dedicated workforce lead by a common vision to establish a company that can provide unique specialized services to various vital business sectors, with the tools of innovative strategies and in hand talent. We are providing world class self priming pumps which is technically most advanced, excellent energy efficient and durable. Organization has also a testing laboratory as per ISI requirement.

We will continue to work hard and pursue first-rate quality and service, creating an enthusiastic, open, sincere, co-operated, pioneering and win-win atmosphere. We earnestly welcome guests from different social sectors to Relief Group in seeking development and creating the brilliancy together.

Corporate companies across the globe have trusted us because of our domain expertise and the length and breadth of sourcing service portfolio. Our strategic sourcing solutions provide the opportunity to impact the cost without compromising on quality. By integrating solutions from diverse industrial sectors, we poised to become the most reliable 'one-stop' sourcing partner from India.

Since our founding, we have placed our clients at the heart of our business, allowing us to deliver value to a broad range of core business in the pumps markets. Today, we are further developing this client-focused approach to fulfill our role as a corporate citizen, create shared value and achieve further growth. The journey is going on.....

RAJESH VORA,
Chairman & Director
RELIEF PUMPS

INDUSTRIES WE SERVE

CONSTRUCTION

A de-watering process involves using our self priming pumps to remove water from a construction sites, pond, river, mine shaft, or any other area.

WATER TREATMENT

Our self priming pumps move water from one place to another, and they provide added pressure that & sometimes needed to perform treatment functions. Pumps are used to inject water treatment chemicals, to supply compressed air, and to move treated water to its point of use.

RESIDENCE

Our self-priming pump is able to overcome the problem of air binding by mixing air with water. After it gets rid of the air, the pump will continue to move water. Self-priming pumps can handle a variety of fluids and they do well with slurries, corrosive fluids, and solids.

AGRICULTURE

Our self priming pumps can be used for the farming operations like dewatering applications, irrigation, liquid fertilizer distribution , animal waste collection and waste pit agitation

METAL, WOOD & CHEMICAL INDUSTRIES

Certainly self-priming pumps are worth considering when you realize the high number of air-entrained liquids in a paper mill or the volatile liquids used in metal and chemical processes.

SEWERAGE SCHEMES

In case of large area being served with flat ground, localities at lower elevation or widely undulating topography, our self priming pumps perform efficient suction process of sewage water around the area

HOSPITALS

As a prestigious company of the market, we are offering a wide array of Self Priming Muddy Water Pump for Hospitals. Our clients can take the offered Self Priming Muddy Water Pump according to their varied specifications.

WHO WE ARE ?

Proudly Celebrating 30 Years! Relief Pumps was organized in Rajkot and continued to grow beside name for superior design, engineering and manufacturing of self priming pumps for large choice of applications.. Relief Pumps, under the able administration of Mr. Rajesh Vora who is an experienced and qualified technocrat, has grown by leaps and bounds since its inception. In 1988, Relief Pumps built and occupied 30000-square-foot facility in industrial hub Rajkot with the manufacturing and engineering operations as well as administrative and marketing staffs.

With the assistance of our latest manufacturing techniques and facilities, we are able to manufacture high grade pumps & spares that guarantee trouble free, long life operation and excellent interchangeability of spares with the assembly capability of three hundred items per day, We are an active member Of Rajkot Engineering Association & Rajkot Pump Manufacturer Association.

Relief Pumps remains committed to designing and developing innovative products to fulfill the fluid handling needs of both current and rising markets. To maintain our role as a frontrunner in the design and manufacturing of self priming pumps, we & 39 still invest within the best instrumentation and people. That combination is one that our competitors cannot match. We are exporting our quality products in AFRICA, ETHIOPIA, KENYA, COLOMBO, BAHARAIN, LIBYA, MAURITIUS, AUSTRALIA, NEW ZEALAND, DUBAI, IRAQ.

WHAT WE DO / ENGINEERING

Relief Pumps brings more than three decades of expertise in the design and manufacturing of Self priming pumps. Through experience, we can quickly identify and focus on the crucial aspects of every design of project and develop an approach to satisfy the most demanding performance requirements. The designed pumps are highly acknowledged for their long service life, smooth operations, high efficiency, minimum maintenance and hassle free performance. These pumps are well- manufactured by the special team of our professionals in adherence to the set industry standards using the qualitative grade components and modern technology. These pumps are available in various technical specifications as per the requirements of our clients. Our offered pumps are examined against various predefined quality parameters to deliver a flawless range at the clients' end.

Our engineers use progressive solid modeling software, design for manufacturing techniques and fast prototype capability to move rapidly from initial concept to first production. Our application design expertise encompasses a broad range of markets. Similarly, our engineers are accustomed to working with a wide range of materials. Commonly used materials include bronze, ductile iron, aluminum, forged iron and stainless-steel.

Advanced technology is central to our manufacturing operations. Use of progressive instrumentality and strategies translate into speed, uniformity and consistent high quality. Computer numerical control (CNC) machining centers on the factory floor are linked to a central server for rapid loading of machine programs. This direct interface speeds set-up which, in turn, boosts productivity. Automated machining also improves precision in milling, boring, facing, drilling and other critical operations.

VISION

We constantly envisioned to become a company that strives for quality and customer satisfaction by providing best self priming pumps with global benchmarks and to be a company which integrates Health, Safety and Environmental considerations into all its business decisions and activities.

We, at Relief Pumps understand that sustainable growth is achievable only by following stringent quality standards not just in products but at every stage of the product development. Hence our vision is to incorporate quality into everything.

MISSION

Our mission is to make significant contribution to the life quality enhancement by producing innovative self priming pumps that work with improved performance while ensuring a high degree of reliability. For that we are committed towards providing products that last long and are highly efficient. We aim to provide our customers with the best quality services and solutions for their water pumping and water supplying requirements to make full and intelligent use of resources.

We always follow fair business practices & develop intimate customer relationship and strive to improve whatever is done & how it is done and also continue to earn & be worthy of our customers' trust.

WHY US?

FEATURES:

Sturdiness

Perfect Finish

Accurate Design

Optimum Quality

Experienced Workforce

Low Voice

High Volumetric Efficiency

Low Response Times

Economy & Simplification of Hydraulic System

Modular Design

Energy Saving

Long Working Life

Wide Distribution Channel

Competitive prices

Timely Deliveries

Easy Payment Modes

Transparent Business Dealings

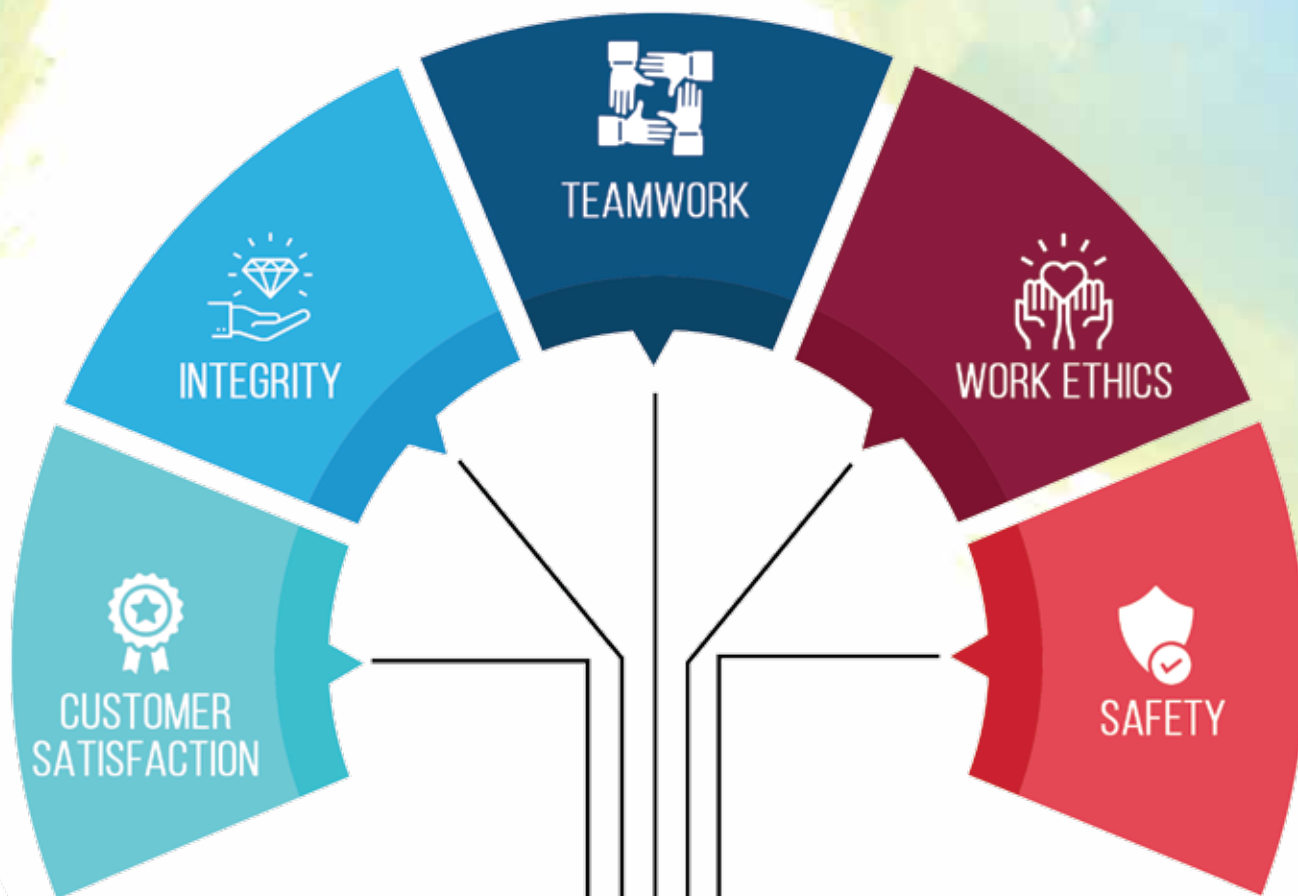

RESEARCH & DEVELOPMENT

A strong research and development program is fundamental to innovation. At Relief Pumps, our innovative muscle derives from a highly trained and experienced research staff backed by a fully equipped laboratory for conducting rigorous performance and endurance testing. We focus on strengthening our technical capabilities. We make significant efforts in researching fluid control, developing new products and new technologies. The reason our customers tell us, "Relief products are unparalleled high quality products" is also due to our business structure with this technical department at the core. Prototypes are frequently subjected to elevated ambient conditions to simulate actual operating environments and gain more reliable data.

In addition to obvious attributes like no leakage or breakdown, we must achieve high accuracy according to application needs. In order to develop products that meet the expectations of our customers, we make significant efforts in research and development.

VALUES

CUSTOMER SATISFACTION

We value our customers by listening carefully, responding honestly, and effectively meeting their individual needs in a timely manner.

INTEGRITY

Everything we do is driven by our integrity. Customers recognize our honesty and prefer dealing with us with global standard products.

TEAMWORK

We respect everyone's contributions and capabilities in working together from designing a pump to final despatching to serve our customer's needs.

SAFETY

For generating trustworthiness and bonding with our employees we make positive and innovative contributions to the advancement of safety in our workplace and industry with advancement of technologies.

WORK ETHICS

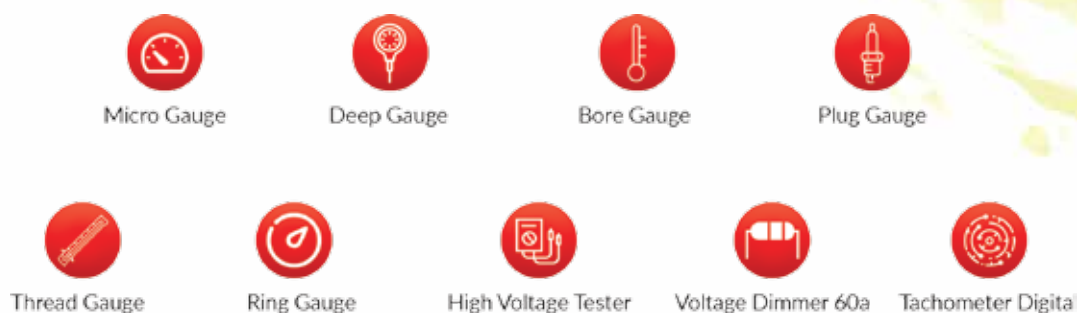

We maintain a strong work ethics along with positive work environment. Relief Pumps is committed to being a positive and safe place to work.

QUALITY CONTROL & TESTING

At Relief Pumps, quality is designed into every component and every pump we build. From concept, through development and on into production, our focus is to provide durable and reliable products that satisfy every customer requirement. Quality is monitored throughout the production process using state-of-the-art gauging systems. Critical points on every production unit receive 100% inspection. Our emphasis on quality is recognized by international standards agencies.

For making a defect free product range of pumps and their parts, we ensure that all our products are manufactured using the best grade components that are procured from the authentic vendors of the market. The different parameters through which the quality of our pumps and parts have been measured include....

Being a client-centric firm, we have been able to attain the maximum satisfaction of our clients by offering them a quality assured range of products.

Before final dispatch, each and every component in pump is thoroughly tested and run through its complete running cycle. In order to assure the reliability and performance, products are also tested as complete units. The stringent quality tests are undertaken under the surveillance of experts. From designing to manufacturing, we design our pump products to meet the international quality standards

INFRASTRUCTURE

We have maintained a fully automated manufacturing unit, which is well- equipped with latest technology machines and equipment. These machines enable us to produce optimum quality products at minimum possible time.

We have a large manufacturing unit that sprawls over a wide area of land. The entire unit is well-facilitated with advanced technology and equipment in order to manufacture the best quality pumps and motor for our valuable clients. This unit is operated by our team of experienced professionals that enables us to meet the bulk and urgent requirements of our esteemed clients within a scheduled time- frame. Moreover, in order to enhance our production capacity, we regularly upgrade our manufacturing unit as per the latest developments

STORAGE DEPARTMENT

MACHINE SHOP DIVISION

QUALITY CONTROL LAB

WINDING DEPARTMENT

MOTOR ASSEMBLY DEPARTMENT

PUMP ASSEMBLY DEPARTMENT

PAINT SHOP DIVISION

PUMP TESTING LAB

FINAL FITTING DEPARTMENT

PACKAGING & DISPATCH DIVISION

INFRASTRUCTURE

Our machines are operated by highly skilled and experienced professionals, which have enough knowledge about the machines. Some of the machines that are installed at our manufacturing unit are as follows:

- Hydraulic Tress - 20 Tone
- Aluminum Profile Cutting Machine
- Air Compressor 1000 Pound
- Heavy duty lathe machine / Light duty lathe machine (2)
- Medium Duty Lathe 1 Machine
- Tapping Machine
- Drill Machine Stand Grinder
- Coil Winding Machine
- Chain Grinder
- CNC 4 Machine

BUSINESS WITH US

Thank you for your interest in doing business with Relief Pumps. As a company of leading brand in competitive market of self priming pumps, we realize that being innovative and successful in the global market requires collaboration externally as well as internally. Working together is instrumental and we support the sharing of new ideas as well as past successes. We operate within the highest standards of business ethics and in accordance with all applicable laws and regulations.

We encourage you to contact us if you are interested in becoming a supplier or if you would like to license one of the brands from our diverse portfolio. We are also interested in learning about new technologies that will help meet the needs of our consumers and in sharing our intellectual property to help other companies do the same. Please browse the appropriate section below for available opportunities as well as guidelines and applications.

खुशहाली हर कदम पे!
